PROFESSIONAL SUMMARY

Detail-oriented Information Systems graduate with a strong focus on cross-platform mobile application development (iOS & Android). Leverages hands-on technical experience gained from impactful internships at PT Indonesia AirAsia and PT Younexa Inti Material. Proven ability to lead and collaborate within cross-functional teams, utilizing structured brainstorming and strong communication to translate complex problems into optimal mobile solutions.

EDUCATION

Bachelor's Degree in Information System

Institut Teknologi Del - Indonesia • GPA 3.52/4.00 • 2022 - 2026

WORK & ORGANIZATION EXPERIENCE

Mobile Developer - Internship

PT Indonesia Air Asia

Feb 2026—Aug 2026, Tangerang, Indonesia

- Led a 2-person development team in building and optimizing cross-platform mobile applications using Flutter and Laravel.
- Spearheaded the backend migration from Firebase to a self-managed Virtual Machine (VM) infrastructure on Google Cloud Platform (GCP) to enhance data sovereignty and control.
- Engineered a custom RESTful API with Laravel and developed a Web Admin Dashboard to streamline departmental data management.
- Implemented performance and UI/UX optimizations for the core mobile application to improve overall user experience.
- Proposed and developed an AppSheet solution as a secure, compliant alternative to meet strict organizational data regulations during the server infrastructure deployment phase.
- Facilitated weekly technical meetings with stakeholders, refining project management and communication skills throughout the 6-month internship.

Android Developer - Internship

PT Younexa Inti Materials

Jun 2024—Aug 2024, Bekasi Regency, Indonesia

- Collaborated with the supervisor to analyze existing operational challenges and proactively proposed technical solutions to address them.
- Designed and developed a native Android application from the ground up using Java, ensuring seamless performance and alignment with business requirements.
- Integrated the mobile application with existing backend systems by leveraging provided APIs to enable efficient data communication and functionality.
- Managed the end-to-end development lifecycle, including initial requirement gathering, system design, and implementation.

Academic Assistant for Computer Architecture and Organization

Institut Teknologi Del

Jan 2024—Jun 2024, Toba Samosir, Indonesia

- Collaborated with a team of assistants to design and develop comprehensive laboratory modules for the Computer Architecture and Organization course.
- Authored and curated quiz materials to assess student knowledge, reinforce core concepts, and enhance long-term memory retention.
- Evaluated student performance by monitoring practical sessions, providing constructive feedback, and assessing their technical understanding throughout the semester.
- Facilitated laboratory learning sessions, ensuring students effectively grasped complex architectural concepts through hands-on practice.

Academic Assistant for Visual Programming

Institut Teknologi Del

Aug 2023—Dec 2023, Toba Samosir, Indonesia

- Collaborated with fellow assistants to design and develop structured laboratory modules for the Visual Programming course.
- Delivered direct instruction and guidance by explaining complex study cases and programming concepts to students during practical sessions.
- Developed quiz materials to assess student comprehension and reinforce technical knowledge.
- Evaluated student performance through consistent monitoring of hands-on exercises, providing feedback to ensure practical application of programming principles.

Information System Student Association – Chief of Education Division

- Institut Teknologi Del
- Sep 2024—Feb 2026, Toba Samosir, Indonesia
- Led and mentored a team of 7 members in the Education Division, fostering a collaborative environment to disseminate technological insights and trends to the student body.
 - Designed and executed community outreach programs, including school visits that utilized interactive and gamified learning methods to introduce technology to younger students.
 - Conducted strategic analysis to identify emerging technological opportunities and potential implementations that could enhance the academic and technical environment within the campus.
 - Collaborated cross-functionally with the Association Chief and other divisions to ensure the successful delivery of department-wide programs and organizational goals.

Study Orientation & Campus Introduction – Chief of Documentation Division

- Institut Teknologi Del
- Jul 2023—Aug 2023, Toba Samosir, Indonesia
- Led a documentation team in capturing and archiving key highlights of the campus orientation event, ensuring professional coverage of all scheduled activities.
 - Managed task delegation based on individual team members’ skill sets to optimize workflow and output quality for diverse multimedia projects.
 - Facilitated cross-divisional coordination to align documentation goals with the broader vision of the event organizers, ensuring consistent branding and messaging.
 - Spearheaded the design and production of visual content, overseeing the creation of various creative components to effectively showcase the event’s atmosphere and significance.

PROJECT

SQL Antacid

Final Project • Institut Teknologi Del • 2025 – 2026

Text-to-SQL Chatbot is an AI-powered application that converts natural language into SQL queries using Retrieval-Augmented Generation (RAG) and a self-correction mechanism. It improves query accuracy and reliability by retrieving relevant context and iteratively refining generated SQL for database interactions.

Airmaster Mobile Application

PT. Indonesia Air Asia • 2025

Airmaster is a cross-platform mobile application built with Flutter to digitize business processes and improve workflow management. It provides real-time operational monitoring through backend integration, enabling transparent task tracking, streamlined operations, and improved organizational efficiency.

Airmaster Web Application

PT. Indonesia Air Asia • 2025

Airmaster Web Application is an administrative dashboard that manages operational data and provides secure APIs for the Flutter-based Airmaster mobile application. It enables efficient data administration, real-time synchronization, and seamless communication between mobile clients and the company’s backend systems.

Warehouse Application

PT. Younexa Inti Materials • 2024

Warehouse Application is a native Android application designed to improve warehouse and inventory management. It enables real-time stock monitoring, tracks material intake and dispatch, and maintains accurate inventory records to support efficient warehouse operations.

D’Mantis Application

PT. Kalimantan Prima Persada • 2024

D’Mantis Application is a web-based asset management system that digitizes equipment request, issuance, and return processes. It provides real-time asset tracking, reporting, and inventory control to improve operational transparency and asset lifecycle management.

Facility Maestro Application

Course Project • Institut Teknologi Del • 2024

Facility Maestro Application is a web-based asset management system for student organizations that digitizes asset request, approval, and return processes. It centralizes inventory tracking, improves asset availability monitoring, and streamlines administrative operations.

SKILLS

Programming Language: *Python, Dart, Java, PHP, JavaScript, HTML, SQL, C*

Frameworks & Libraries: *FastAPI, Flutter, Laravel, CodeIgniter. React, Bootstrap, HTML5, CSS3*

Tools & Platform: *Hugging Face, Git/Github, Google Cloud Platform, Android Studio, VS Code, Postman*

Technical Competencies: *AI Development, Mobile App Development, Web Development, RESTful API Integration, LLM Integration, Generative AI Features Development, Management*

Soft Skills: *Analytical Thinking, Technical Writing, Problem Solving, Team Collaboration, Project Management*

CERTIFICATION & TRAINING

Associate Data Scientist • Badan Nasional Sertifikasi Profesi (BNSP)
Issued: December 2025 | Valid until: December 2028

TOEFL ITP (Score: 503) • Educational Testing Service (ETS)
Issued: August 2025

LANGUAGE

Indonesian (Native) • **English** (Intermediate) • **Bataknese** (Fluent)

PUBLICATIONS

Intelligent Pilot Training Recommender System and Electronic Flight Bag Handover Application | Journal of Intelligent System and Computation (INSYST) | 2025 |

- Co-authored and developed an intelligent mobile application using Flutter to streamline pilot training and EFB logistics, integrating a machine learning-based recommendation engine to automate and optimize remedial training assignments based on pilot assessment patterns.
